Portfolio: <https://nzulapricillaportfolio.netlify.app/>

PROFESSIONAL SUMMARY

A data professional with over 5 years of experience in the corporate banking sector, leveraging data analysis to support credit risk mitigation. Proven ability to analyze complex datasets, having managed a KES 450B loan portfolio to generate insights that reduce defaults and inform branch lending strategy. Skilled in Python, SQL and Machine Learning, with a strong track record of transforming data into actionable insights.

TECHNICAL SKILLS

Programming & Libraries: Python (NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, TensorFlow, Keras).

Database & SQL: MySQL, Querying, ETL Processes, Database Design.

Machine Learning: Predictive Modeling, Feature Engineering, Model Evaluation, Deep Learning, Transfer Learning.

Data Visualization: Power BI, Excel, Matplotlib, Seaborn.

Statistical Modeling: Regression Analysis, Statistical Analysis.

Tools & Platforms: Jupyter Notebook, VS Code, Google Colab, Git, GitHub.

WORK EXPERIENCE

Data Analyst

September 2024 – Present

Freelance | Nairobi, Kenya

- Design and implement end-to-end data analysis solutions across diverse business domains, demonstrating proficiency in the full data lifecycle from sourcing to delivery.
- Source, clean, and preprocess raw data from multiple sources, ensuring data quality and integrity for downstream analysis.
- Apply statistical modeling, machine learning, and data visualization techniques to extract meaningful insights and identify trends.
- Build interactive dashboards and reports to communicate complex findings to stakeholders in a clear and actionable manner.
- Manage multiple client projects simultaneously, demonstrating strong organizational and time-management skills.

Relationship Officer – Credit Monitoring & Collections

November 2021 – August 2024

Equity Bank Limited | Nairobi, Kenya

- Analyzed financial data and loan repayment patterns for a portfolio of 30,000 clients (Corporate, SME, and Retail) valued at KES 450 Billion, identifying trends and default risks.
- Developed and maintained Excel-based reports and dashboards to monitor portfolio performance, track overdue payments, and visualize key risk indicators for management review.
- Utilized data-driven insights from customer payment histories and financial statements to support account restructuring and creditworthiness assessments, directly contributing to a 30% reduction in monthly provisioning and account slippage.
- Extracted and synthesized client data from core banking systems (FinOne, Finacle) to ensure accurate reporting and compliance with credit monitoring protocols.

Relationship Officer – Cash

August 2019 – October 2021

Equity Bank Limited | Nairobi, Kenya

- Processed and reconciled high-volume client transactions, ensuring accuracy and compliance with financial regulations.
- Monitored and analyzed client account activity to identify irregular patterns and flag potentially fraudulent transactions for investigation.
- Compiled and analyzed daily transaction reports to track branch performance metrics, providing data that supported management decision-making.
- Leveraged customer insights gathered during client engagements to inform branch-level growth and service improvement strategies.

PROJECTS

Flower Image Classification with InceptionV3 | Deep Learning & Computer Vision

Skills: Python, TensorFlow, Keras, InceptionV3, Transfer Learning, Data Augmentation

GitHub: <https://github.com/priscillanzula/Inception-V3-Flower-Classification.git>

- Implemented a deep learning model using Transfer Learning with a pre-trained InceptionV3 architecture to classify images across 5 flower categories.
- Engineered the input pipeline by applying image resizing, normalization, and data augmentation techniques to improve model generalization and reduce overfitting.
- Fine-tuned the model by replacing and retraining the final layers, achieving 95% accuracy on the validation set.

House Price Prediction | Regression Analysis & Predictive Modeling

Skills: Python, Scikit-learn, Pandas, NumPy, and Matplotlib

GitHub: <https://github.com/priscillanzula/pro-realty.git>

- Developed a multiple linear regression model to predict King County housing prices, achieving an R-squared of 0.64.
- Provided strategic insights on key property features to maximize ROI, guiding Pro Realty's investment decisions and enhancing portfolio diversification.

E-Commerce Database Design | Data Engineering & SQL

Skills: SQL, Database Design

GitHub: <https://github.com/priscillanzula/Ecommerce-Db.git>

- Designed and implemented a relational database schema for an e-commerce platform to manage products, orders, customers, and transactions.
- Ensured data integrity and efficient query performance through normalization and structured schema design.

EDUCATION

Bachelor of Science in Mathematics and Computer Science *September 2015 – October 2019*

Multimedia University of Kenya

PROFESSIONAL CERTIFICATIONS

Data Protection Certification – CIPIT, Strathmore University

October 2024

Data Science Certification – Moringa School

August 2023 – June 2024
